

Survey Analysis for *Respect and Understanding Inc.*

After analyzing the survey completed by thirteen candidates to study the result of the program implemented by *Respect and Understanding Inc.*, here is my evaluation. In the survey 7 questions were asked on results of the program on irritability, ability to eat, ability to express themselves, social behavior, exercise, rest and comfort of the residents. Overall 65.93% of the votes were excellent, 15.38% of the votes were good and 15.35% of the votes said that the program depended on the individual. 3.3% of overall votes were of no response. This puts the program at an 81.28% (excellent/good) approval rating overall. With regard to specific results of the program, all results show excellent/good approval ratings except for ability to eat. The effect of the program on ability to eat shows 6 candidates approved of the program(excellent/good), 2 candidates said it had no effect, 4 candidates said it depended on the individual and one didn't respond.

My evaluation is that the program overall has significant approval ratings and thus merits further implementation. Here are the table and graph for your consideration.

	Irritability	Ability to eat	Express themselves	Social Behavior	Exercising	Rest easier	Brought comfort	Total
No Response	0	1	0	0	1	1	0	3
Excellent	10	3	10	11	7	8	11	60
Good	1	3	2	1	2	2	1	12
No Effect	0	2	0	0	0	0	0	2
Bad	0	0	0	0	0	0	0	0
Poor	0	0	0	0	0	0	0	0
Depends	2	4	1	1	3	2	1	14
